Brilliant New Design

Merchant Media is designed to attract the consumer to the machine and inspire confidence. The new customer interface area has been styled in a high gloss, durable finish with LED surround lighting. The interface panel and LED lighting are customisable to any location or brand attracting more consumers and boosting sales. When the Media range is fitted with Currenza payment systems the design is further enhanced with matching coloured LEDs that backlight the transparent payment bezels.

Engineered for maximum return

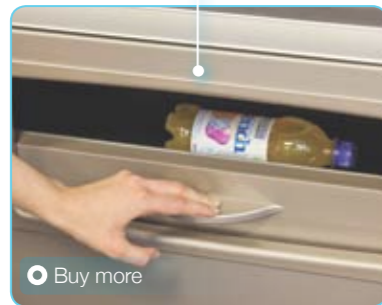

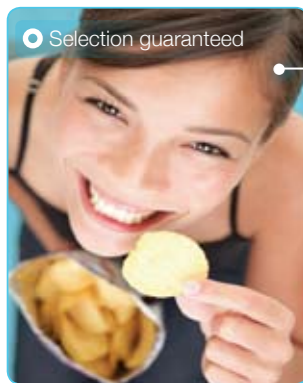

Media Platform Features

Media is equipped with a new state-of-the-art electronics platform (Atlas) that integrates the following capabilities into one powerful solution:

- Touch screens
- Advertising
- Promotions
- Planogram images
- Nutritional information
- Product browsing...

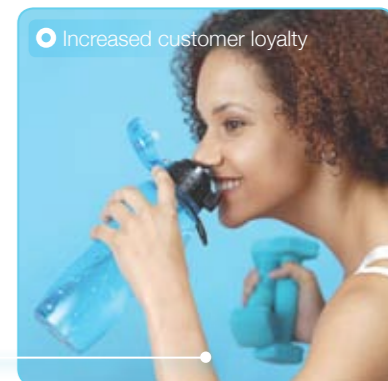

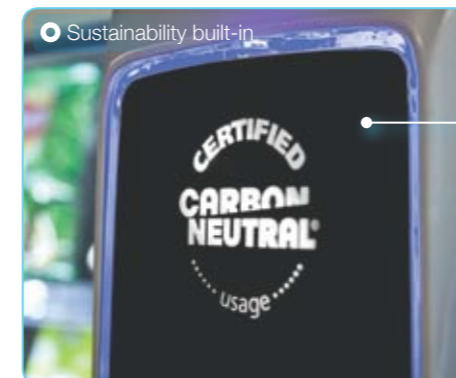

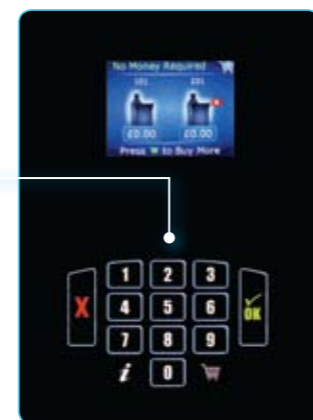

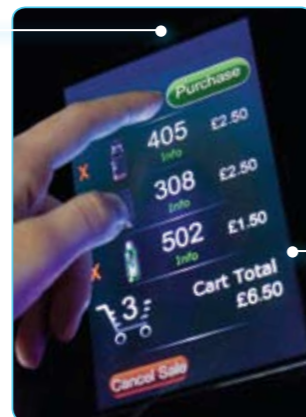

...and this is just the beginning..!

Look out for cashless payment options including NFC and mobile wallet, content management tools and much more as we build on the Atlas platform.

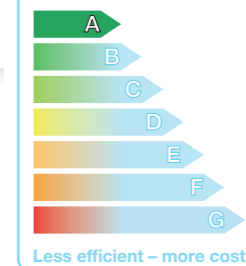

New Media Touch or Media Keypad

Choose between the new Keypad or Touch user interface. Media Touch is a fully interactive 7" colour touch screen made from tempered, chemically strengthened glass that is scratch resistant. Media Keypad consists of a 3" colour display and fully integrated capacitive sensing numeric keypad. The workflow in both user interfaces is designed to make the whole transaction process as easy and intuitive as possible. Users can fill up a virtual Shopping Cart with multiple items and pay in one simple transaction. Media always gives the user the option to 'Buy More' with one simple click driving increased spend. The screen communicates the different payment options available and allows the user to correct any mistakes ensuring they end up with the product they want.

Most efficient - less cost

Less efficient - more cost

Designed with the Environment in Mind

How a product looks and performs matters, but so does its impact on the environment. That's why Media Merchant is made from highly recyclable materials and it is certified Carbon Neutral for 5 years of its life in the field. Low energy LED lighting, efficient refrigeration and energy saving software all contribute to Media Merchant being awarded the highest EVA EMP rating of A++ for energy efficiency.
